

# ENVIFRI

Manas Chauhan

# OVERVIEW

- **App Name:** EnviFri
- **App Description:** This is an app which shows solutions for certain environmental problems.
- **Track:** Youth Individual
- **Category:** Climate & sustainability

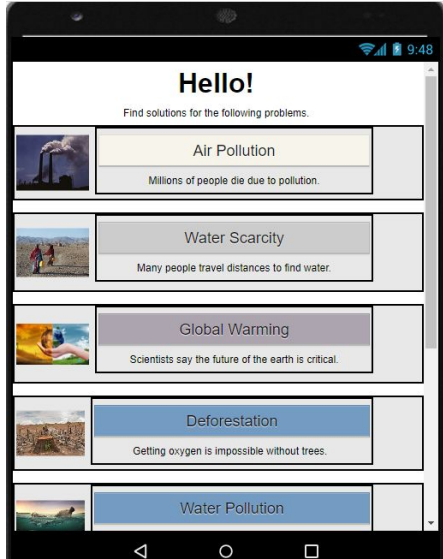

# THEME

In the 21st century, the earth changed a lot. When technology got advanced, it started emitting more pollutants and harmful gases which increased the carbon emission rate and global warming. Right now the Earth is at stake. To keep it at a stable and safe position, we need to make many changes. In lieu of this, I made an app which shows solutions for certain environmental problems.

# INSTRUCTIONS

Step 1: Click on any of the environmental problems.

Step 2: Find Solutions

Step 3: Click on the back button to go to the main screen. Click on the menu to switch from one environmental problem to another.

# LIMITATIONS

As of now, my app has no limitations.

# ACKNOWLEDGEMENTS

- Atharv Gupta - He helped me with the code.
- Aayush Sharma - He helped me with the code.
- Nityam Chaudhary - He helped with the code.
- Akshut Goyal - He helped me in the UI.
- Payal Singh - She recommended me many things to add in my app.
