OVERVIEW

- **App Name:** No Olvido

- **App Description:** early detection of the Alzheimer to proper care that help people preserve their memories and avoid the forgetfulness associated with this disease.

- **Track:** Adult Individual

- **Category:** Education and research

THEME

In 100 words or less, describe the problem that you chose to address, and why you were interested in solving it. Please note that this portion of your submission will be published if you are selected as a finalist or winner.

The problem being addressed by the "No Olvido" app is Alzheimer's disease and its impact on individuals and their families.

Many times, symptoms may be overlooked or attributed to normal aging, delaying diagnosis and treatment. Early detection is crucial as it allows for timely intervention and access to appropriate medical and support services.
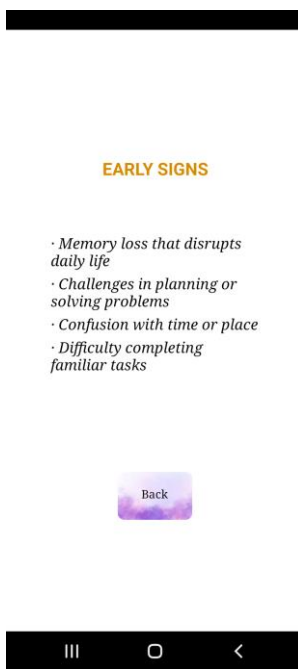

INSTRUCTIONS

Screen 1

Alzheimer's is a progressive disease that destroys memory and other important mental functions.

Early signs

Take test

What should you do when it's cold?	Choose ▼
When can't you crose the street?	Choose ▼
What should you do when someone fall?	Choose ▼
Where should you sleep?	Choose ▼

Next

Touch the spinners to select the answers.

RECOGNITION MEMORY

Choose the person

Next

Choose the image of the person.

When you're done, touch the "Next" button.

INSTRUCTIONS

EPISODIC MEMORY

Read the story

Three little pigs set out to build their own houses. The first pig built his house with straw, the second pig used sticks, and the third pig constructed a house with bricks. A big, bad wolf came and blew down the first two houses, but he couldn't destroy the brick house. The wolf tried to enter through the chimney, but the pigs outsmarted him, and he ran away. The three little pigs lived happily ever after in their safe brick house.
