

KARAM QUIZ

Karam Eit Al Haraj

SUMMER APPATHON

OVERVIEW

- **App Name:** Karam Quiz
- **App Description:** It's a quiz app that employs AI (ChatGPT) to enhance users' general knowledge, while also adapting the content according to the user's age for a more personalized learning experience.
- **Track:** Youth Individual
- **Category:** Education & research

THEME

To address the time wasted on unenriching mobile applications, I have created an application leveraging AI, specifically ChatGPT, to offer age-appropriate quizzes to each user. These quizzes cover a variety of subjects, such as history, sports, and general knowledge. The goal is to optimize mobile usage by providing a fun and educational experience, promoting continuous learning. This approach will enable users to develop their knowledge in an enjoyable way while making better use of their time on their mobile devices.

INSTRUCTIONS

Step 1: Welcome Screen

Name :

Age :

General culture	Geography
History	Sport

Step 2: Enter your name and age, and choose the theme.

Question 2 for karam

Which animal is known for its black and white stripes?

Lion	Giraffe
Zebra	Elephant

Step 3: Based on your age and the selected theme, a question will be presented to you. You can choose the correct answer from four options.

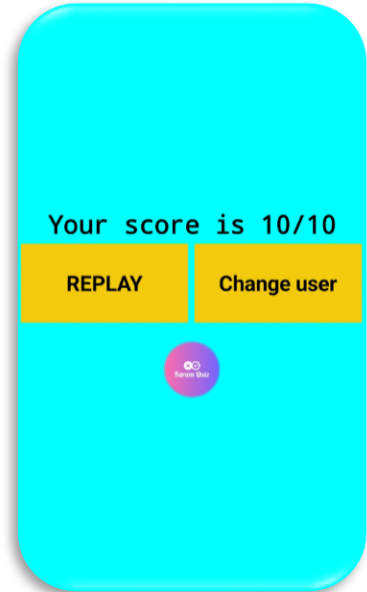

INSTRUCTIONS

Step 4: Choosing the correct answer will display your choice in green.

Step 5: In the event of selecting an incorrect answer, your choice will appear in gray, while the correct answer will be highlighted in green.

Step 6: After completing the quiz, your score will be displayed / you can either replay the quiz or switch to a different user.

LIMITATIONS

The chatbot extension is subject to default usage limitations. To have unrestricted access, I purchased a paid API key. The project I sent you includes this OpenAI API key.

ACKNOWLEDGEMENTS

- My mother: She provided me with the OpenAI API key and explained how to use the JSON format and dictionaries.
- My father: He assisted me in creating both presentation and video.
