MIT APP INVENTOR

DOCTOR BUG

Rachel, Wonjun, Yesung, Junha

Please upload a high-quality, well-lit headshot against a plain background for each of your team members.

SUMMER APPATHON

OVERVIEW

- **App Name:** Doctor Bug
- **App Description:** This app allows people to have folk remedies, medication, and nearby hospital based on the chatbot recommendation. When they got sudden disease or accident, they can cope with those without having confusion.
- **Track:** Youth Team
- **Category:** Mental health & wellbeing

THEME

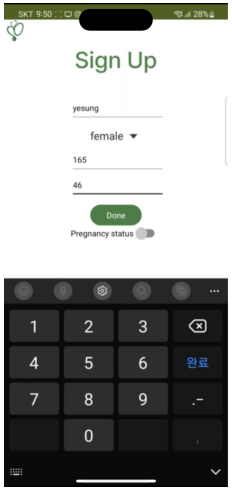
In 100 words or less, describe the problem that you chose to address, and why you were interested in solving it. Please note that this portion of your submission will be published if you are selected as a finalist or winner.

Due to the aftermath of Covid-19, it was hard to go to the hospital, and our health deteriorated a lot as we stayed home most of the time. Now that Covid-19 has eased, we can go to the hospital, but there are people who have limitations on access to the hospital. Also, to help people who need immediate measures for relief when people suddenly get injured, we developed an app that provides folk remedies, recommends medication, and shows nearby hospitals.

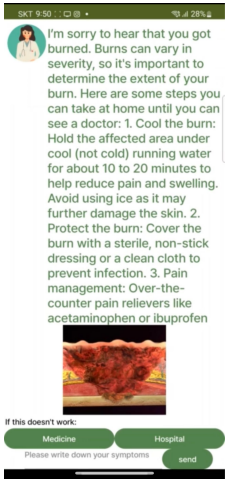
INSTRUCTIONS

Please provide step-by-step instructions for using your app, along with high-quality screenshots of the app. Feel free to add as many slides as needed.

Step 1: start page

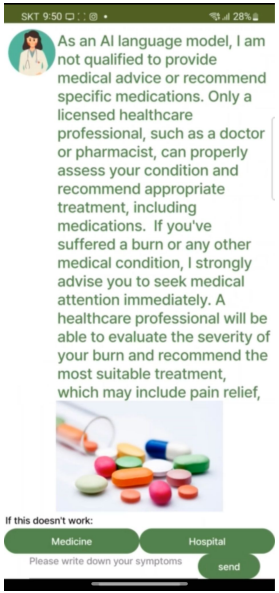


Step 2: sign up page



Step 3: chatbot recommends folk remedies

INSTRUCTIONS



Step 4: chatbot recommends medication

Step 5: chatbot recommends nearby hospitals

LIMITATIONS

In 100 words or less, describe the limitations of your app and what people should carefully consider when using it.

Since our answers are based on chat GPT, the quality of the answers might not correspond with the prescription of doctor or professionals. But the chatbot itself indicates that it is not a doctor, but an AI chatbot, I think this allows people to consider the answers as much as they want and use the app without a big problem.

ACKNOWLEDGEMENTS

Please list the names of anyone who helped you with developing your app, and describe what type of help they provided.

- none

MIT APP INVENTOR

APPENDIX

If you have any supplementary information you wish to include, feel free to add it to the Appendix. **This section is entirely optional.**

It is recommended to add materials to the Appendix if you submitted a hardware project (e.g. with schematics, flow diagrams) or if your project included significant programming components outside of the MIT App Inventor platform.

Please be aware that judges reserve the right to exercise their discretion in reviewing materials within the Appendix, and they may not review its entirety if they consider it excessively lengthy.

DEAR MIT

Thank you for this wonderful opportunity to participate this competition. It was such an honor to be a part of this appathon. We will apply MIT for this 2023 fall admission round. Please look forward for our future and remember our names, **Rachel Sooyeon Lee**, Wonjun, Yesung, and Junha from South Korea. Enjoy our video!
