

# D.E.I.T.

(DIVERSE NUTRIENT INTAKE ENERGIZES TODAY)

Junyoung Heo

# OVERVIEW

- **App Name:** DIET : Diverse nutrient Intake Energizes Today
- **App Description:** “DIET” provides a suitable diet for the user based on the user information. It may improve the user’s mental health and reduce food waste thrown away indiscriminately by providing a healthy diet in the appropriate amount.
- **Track:** Youth Individual
- **Category:** Mental health & wellbeing

# THEME

Mental health & wellbeing.

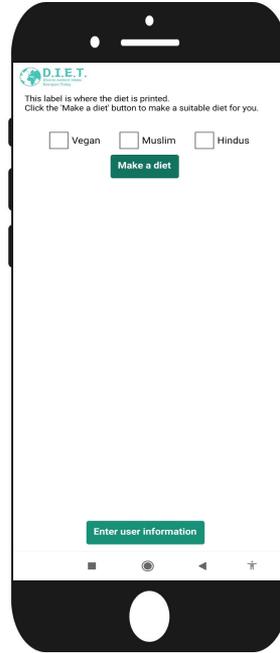

Recently, I gained a lot of weight and was stressed out mentally due to my broken eating habits. And I became interested in solving this problem because I thought there would be other people who are experiencing the same hardships as me.

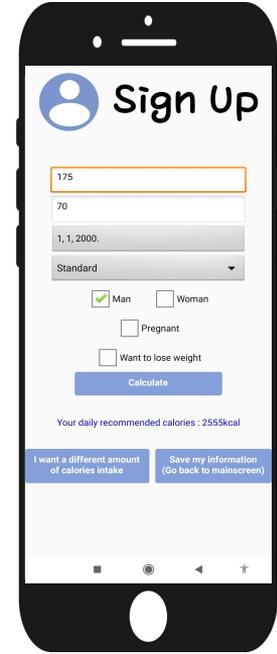

# INSTRUCTIONS

**Step 1 :** Click "Start" button to move to Main screen.

**Step 2 :** Move to SignUp Screen before making a suitable diet for user.

**Step 3 :** Enter user information and go back to Main screen.

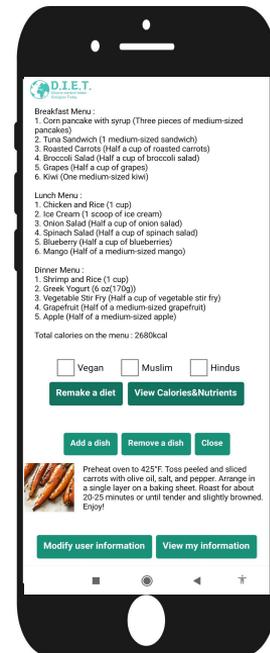

# INSTRUCTIONS

**Step 4 :** Make a diet. The menu is configured based on user information. For example, for users who want to lose weight or are active in exercise, a protein-oriented diet is provided.

**Step 5 :** Users can add or remove dishes if they want another dish instead of one of the menu on their diet. (Function of adding a dish used Chatbot)

**Step 6 :** Users can view the recipe for a dish of the menu whenever they want. (This function used ImageBot and Chatbot)

# INSTRUCTIONS

**Step 7 :** Users can view nutritional information about their diet, such as calories and nutrients, at any time. (Information of all dishes is stored in my personal firebase database. It was written by referring to several sites such as <https://www.nutritionix.com/>)

# LIMITATIONS

Information of all dishes, such as calories and nutrients, may vary depending on many factors like recipe.

# ACKNOWLEDGEMENTS

- Teacher Kim : Shared ideas for themes together through brainstorming.
- Chaewon Yoo (Friend) : Assisted in design the logo
- Minjae Kim (Friend) : Assisted in video script review
- Hyunjin Jeon (Friend) : Assisted in data research

# APPENDIX

There may be some buffering depending on the device as this application contains many codes & user interface elements.

This program used chatbot and imagebot. As I am using the free API KEY provided by the App Inventor, functions that use chatbot and imagebot may not work properly if the user uses more than the limit.

Information of all dishes was written by referring to several sites such as <https://www.nutritionix.com/>
